

Advancing Care in Amyloidosis:

Evolving Trends & Future Directions

Symposium Co-Chairs: Giampaolo Merlini, MD · Morie Gertz, MD, MACP

Wednesday, 28 March 2018, 07:20 – 08:50

Goho & Josai (Main Hall) | Floor 2F | KKR Hotel Kumamoto

Continental breakfast will be provided starting at 06:45

Objective

To discuss the evolution of diagnostic, assessment and management approaches for AL and ATTR amyloidosis, with a focus on biomarkers, imaging and treatment response goals

07:20 – 07:30	Welcome and introductions	Giampaolo Merlini, MD
07:30 – 07:50	Cardiac amyloidosis: can we diagnose it earlier?	Pablo Garcia-Pavía, MD
07:50 – 08:10	Role of imaging in amyloidosis: past, present and future	Martha Grogan, MD
08:10 – 08:30	What does minimal residual disease mean in AL amyloidosis?	Giovanni Palladini, MD
08:30 – 08:45	Panel discussion	All
08:45 – 08:50	Closing remarks	Morie Gertz, MD, MACP

This symposium is sponsored by:

About Prothena

Prothena Corporation plc is a global, late-stage clinical biotechnology company establishing fully integrated research, development and commercial capabilities and focused on advancing new therapies in the neuroscience and orphan categories. Fueled by its deep scientific understanding built over decades of research in protein misfolding, Prothena seeks to fundamentally change the course of grave or currently untreatable diseases associated with this biology. Prothena's pipeline of antibody therapeutic candidates targets a number of indications including AL amyloidosis (NEOD001), Parkinson's disease and other related synucleinopathies (PRX002/RG7935) and ATTR amyloidosis (PRX004). The Company continues to advance additional discovery programs against targets including tau, A β (Amyloid beta) and ALECT2 where its deep scientific understanding of disease pathology can be leveraged. For more information, please visit the Company's website at www.prothena.com.

Prothena Biosciences Inc, 331 Oyster Point Blvd, South San Francisco, CA 94080, USA
